Table top and seats are protected by Fusion Advantage™, a plastisol coating with an average .125" thickness and a high-gloss powder coat. The table top is designed to support 100 lbs per square foot and the seats will support 200 lbs per linear foot.

The frames are made of 2.38" O.D. steel tubing protected by a fade resistant powder coat finish featuring a state of the art primer proven to prevent rusting. Frame is portable in design allowing for flexibility in placement.

**Finish**

Fusion Advantage is a heat fused plastisol coating that creates an impervious rustproof barrier and resists UV deterioration, mildew, staining and fading.

The finish has been tested to the requirements of ASTM E1354 and is determined to be in compliance with California Uniform Fire Code 1103.2.1.4.2.

A state of the art primer is applied to all of the under supports, providing extreme rust fighting protection and durability. Treated components exceed the industry standard by 34% in testing by independent sources.
